PROFESSIONAL SUMMARY

Product Designer and full-stack Product Engineer with 5+ years of experience in software design (UI/UX) and engineering. Takes products from idea to prototype to full-stack MVP by pairing design thinking with agentic coding workflows, designing the experience and building the frontend, backend, and data layer behind it. Experienced in AI-powered products, websites, and business management systems across HR tech, banking, insurance, healthcare, logistics, and e-commerce. Collaborative partner to product managers, engineers, and clients in Singapore and Indonesia, from user research and design systems to PRDs, prototypes, and design QA.

SKILLS

Product Design: UI/UX Design, Design Thinking, User Research, Usability Testing, Competitor Analysis, Information Architecture, Wireframing, Prototyping, Design Systems (Atomic Design, Design Tokens), UI Audit, UX Writing, Mobile & Web Design

Product Engineering & AI: Agentic Coding, AI Workflow Design, Prompt Engineering, Full-Stack Development, Flutter, TypeScript, HTML/CSS, Python (Playwright), PostgreSQL, Supabase (Auth, RLS), REST APIs, Data Pipelines, Swift, Go, Laravel, Git/GitHub

Product Delivery: PRD Writing, User Journey Mapping, Business Process Flow, Scrum/Agile, SDLC, UAT, Design Handoff, Stakeholder Management

Tools: Figma, FigJam, Sketch, Miro, Maze, Jira, ClickUp, Adobe Photoshop, Adobe Illustrator

Languages: Indonesian (Native), English (Advanced)

WORK EXPERIENCE

JobTech Pte. Ltd. **Jul 2023 – Present**
Product DesignerSingapore

- Design end-to-end UI/UX for Talented (betalented.ai), a talent and workforce platform with Jobs, Learn, and Workforce Redeployment modules, partnering with the Head of Product and cross-functional teams to turn business goals into shippable features.
- Led the Talented v4.0 redesign across multiple divisions, modernising the visual language and user experience.
- Initiated and lead an atomic design system with documented guidelines and best practices; supported the design manager in implementing design tokens.
- Designed and maintain white-label career platforms for enterprise clients including OCBC (MOBI Career Marketplace), DBS (iGrow), Maybank, AIA, UOB, and IMDA Singapore.
- Contributed to mobile apps NUS Career+ v4 and the Job Transformation Map (Career+ with IBF and MAS).
- Run 1–2 user and competitor research studies per sprint to inform design decisions, working towards a 90%+ quarterly product goal completion target.
- Keep design specs, flows, and assets at 90%+ alignment with releases through UI audits and AI-assisted design QA tickets that compare live builds against Figma.
- Drafted a 90-day AI workflow adoption plan for the product team, covering prompt playbooks, Claude Projects, and API-level workflows for research synthesis, UX copy, and spec handoff.

Anarya Teknologi Indonesia **Mar 2024 – Sep 2026**
Freelance Product Designer & EngineerJakarta, Indonesia

Designed and prototyped management systems for healthcare (Hospital Information System, Laboratory Information System for clinical and anatomical pathology), health insurance and supply-chain finance (BPJS Kesehatan claims, TPA), accounting, tenant management, and logistics/shipping.

- Translated client business requirements into 7+ demo-ready prototypes in TypeScript and HTML/CSS using agentic AI workflows, taking each from discovery to client demo.
- Partnered with product managers and directors to gather requirements and produce PRDs, user journeys, and business process flows for new products and features.
- Worked with domain experts on a FHIR-based healthcare platform with eKYC and eKYB identity verification.
- Conducted UX and competitor research with industry experts; prepared 20+ company identity documents.

PARKEE **Sep 2022 – May 2023**

Junior UI/UX DesignerJakarta, Indonesia

- Led design of new Electric Vehicle Charging and Multipayment features; designed ticketing systems for Grand Indonesia (mall) and PT Pelabuhan Indonesia (port).
- Designed an invoicing dashboard across the operations system, mobile app, and CMS; maintained and reworked the PARKEE design system.
- Initiated PARKEE app UX research by defining the research plan and research questions.

PT Navcore Nextology **Feb 2022 – Jul 2022**

Product Designer (Contract)Bandung, Indonesia

- Designed the NextFlow business process automation ecosystem (Process Designer, Business Analytics Monitoring, Task Manager) and a full-stack app builder platform (Next API, Next Flow, Next ID).
- Owned visual design, prototyping, and the NextFlow Design System; ran daily stand-ups, design sprints, and weekly syncs with business, product, and engineering.

PanenPlaza **Apr 2021 – Feb 2022**

Chief Product Officer (Self-employed)Surakarta, Indonesia

- Led a quick-commerce MVP end to end, starting with market research and FGDs with farmers and traditional market stakeholders.
- Translated business flows into user flows, use case diagrams, and information architecture; built a design system for front-end handoff, ran A/B tests, and managed the Jira backlog.

SELECTED PROJECTS

CareerAI – AI Career Platform for University Students **Jul 2026**

Full-Stack Product EngineerFlutter, Supabase, Python

Career platform that takes students from CV upload and AI skill extraction to skill-gap mapping, learning plans, and matched jobs and scholarships.

- Building the full-stack MVP end to end with agentic coding: Flutter app, Supabase backend (PostgreSQL, Auth with SSO, row-level security), and environment-gated testing kept out of production.
- Built the job data pipeline (Python, Playwright) ingesting 12,000+ postings from Indonesian and global portals, with two-stage deduplication, salary normalisation, job expiry lifecycle, and Supabase sync to power opportunity matching.

EDUCATION

Universitas Sebelas Maret (UNS) **Aug 2019 – Jul 2023**

Bachelor of Computer Science (Informatics), GPA 3.82/4.00

ACHIEVEMENTS

- Awardee, XL Future Leaders Batch 10 and Rumah Kreasi Inovasi Batch 1 (Top 45 of 41,173 participants)
- Student of the Year 2021, Informatics, UNS; Most Outstanding Student (ACTIVE Award), FMIPA UNS 2020 and 2021
- Top 40 Finalist, National Startup Competition, The Greater Hub SBM ITB 2021
- Startup incubation awardee: SEMESTA UNS Innovation Hub (2021, 2022) and FILM 2020
